Disclaimer

*This presentation has been prepared by Harbour Energy plc (the “**Company**”) for general information purposes in relation to its half-year results and may contain forward-looking statements, estimates, and projections regarding results of operations, business plans, and performance of the Company and its subsidiaries (the “**Group**”).*

Forward-looking statements are sometimes, but not always, identified by their use of a date in the future or such words and words of similar meaning as "ambition", "anticipates", "aspire", "aims", "due", "could", "may", "will", "should", "expects", "believes", "intends", "plans", "potential", "targets", "goal" or "estimates". Although the Group believes that the expectations reflected in such forward-looking statements are reasonable, these statements are not guarantees of future performance and are subject to a number of risks and uncertainties and actual results, performance and events could differ materially from those currently being anticipated, expressed or implied in such forward-looking statements. No representation or warranty is made as to the accuracy or completeness of any forward-looking statements, and undue reliance should not be placed on them. Past performance is not indicative of future results. Nothing in this presentation should be construed as a profit forecast or estimate.

The information in this presentation reflects the Group’s views and intentions as of the date of its preparation and has not been independently verified. Except as required by applicable law or regulation, the Group undertakes no obligation to update or revise any forward-looking statements or other information in this presentation. This presentation does not constitute or form part of any offer or invitation to sell, issue, or subscribe for, or any solicitation of any offer to purchase or subscribe for, any securities of the Company or any member of the Group, nor shall it or any part of it, or the fact of its distribution, form the basis of or be relied upon in connection with any contract, commitment, or investment decision.

Certain financial and operational information contained in this presentation has not been audited or reviewed and is based on internal records. Such data may be subject to change. No reliance shall be placed on, and no person shall be liable in any way in respect of, such information. This information includes certain operational and financial measures not presented in accordance with IFRS and, therefore, are not measures of financial performance in accordance with IFRS and may exclude items that are significant in understanding and assessing the Company’s financial results or future prospects. These measures should not be considered in isolation or as alternative performance measures under IFRS. Market, industry, and competitive position data in this presentation may come from external sources or the Group’s own internal estimates and analysis. While the Group believes these sources to be reliable, it has not independently verified the data and makes no representation as to its accuracy or completeness.

To the fullest extent permitted by law, neither the Company nor any of its affiliates, directors, officers, or advisers accept any liability whatsoever for any direct, indirect, or consequential loss arising from the use of this presentation or its contents.

Overview

One of the world's largest and fastest growing independent oil and gas companies

Strategic acquisition of LLOG Exploration (US) announced December 2025, driving resilience and free cash flow growth

Growth and diversification > Resilience and longevity

¹ Includes effects of Harbour's announced acquisition of LLOG and Waldorf and Indonesia asset sales. 2017-2021 production presented on a reported basis; 2024 and 2026 are presented on a pro forma basis

Building a global, diversified, independent oil and gas company

Proposed LLOG acquisition marks Harbour's strategic entry into offshore US

Publicly-listed (UK FTSE)

Production >450 kboepd

Competitive operating costs
and resilient margins

Broad set of strategic organic
investment options

Investment grade

Competitive shareholder
returns

Leading European CO₂
storage position

2025 highlights – another year of strong delivery

- ✓ Excellent operational performance; integration of new assets
- ✓ High return, short cycle investments delivered; good momentum on strategic projects (Mexico, Argentina)
- ✓ Increased and upgraded free cash flow, supported by strict capital discipline in a volatile commodity price environment
- ✓ Announced strategic divestments and M&A will enhance portfolio and materially increase future cash flow
- ✓ Investment grade credit ratings confirmed by Moody's and Fitch
- ✓ Intention to move distributions policy to a payout ratio

474 kboepd 
Up 84% vs 2024 and at top end of guidance

\$13.0/boe 
20% lower vs 2024 and below guidance

\$1.1bn 
FCF (2024: \$0.1bn), c.\$0.5bn upgrade

c.\$545m 
Distributions made in 2025 (2024: \$200m)

 2025 vs 2024

2025 Performance and 2026 Guidance

A focus on safe and responsible operations

Trends reflect 2024 Wintershall Dea acquisition; focused on driving safety performance across expanded portfolio

Occupational safety

TRIR¹ (per million hours worked)

— Harbour — Peer² range — Peer² average

>14 million hours worked
in 2025

Process safety

PSER¹ (Tier 1/2 events per million hours worked)

— Harbour — Peer² range — Peer² average

Strong safety culture
being embedded across portfolio

Greenhouse gas emissions intensity³

kgCO₂e/boe

— Harbour — Peer² range — Peer² average

Targeting 50% reduction⁴
in emissions by 2030 vs 2018 baseline

¹ TRIR and PSER stand for Total Recordable Injury Rate and Process Safety Event Rate. ² Peer data (where available) from Aker BP, Apache, Murphy, Santos, Vår Energi, Woodside and Vista, and sourced from Annual Sustainability and/or ESG Reports. ³ GHG intensity is reported on a net equity share basis. ⁴ Emission reduction target is for gross operated assets, Scope 1 and Scope 2 CO₂e emissions.

Global portfolio: 4 key countries – soon to be 5 with LLOG completion – drive our results

Norway, UK, Argentina and Mexico account for over 80% of our portfolio

Norway: High quality production with significant near field opportunities

UK: Diverse asset base with high degree of operational control

Argentina: Long life production with potential for material growth

Mexico: Large offshore operated oil discoveries providing growth options

¹ Other includes Germany, North Africa (Egypt, Algeria, Libya) and Indonesia and reflects divestment of Vietnam business in July 2025.

2025 production of 474 kboepd, up 84% vs 2024 and at top end of guidance

J-Area (UK): Production at rates not seen since 2013, with new wells online

- Materially increased and diversified production, supported by excellent operational execution and integration of new assets
- Development wells onstream in Norway, the UK, Argentina, Germany and Egypt
- Maria Phase 2 (Norway) and Fenix (Argentina) successfully completed
- Increased production in the UK driven by J-Area and GBA
- High reliability across the portfolio (>90% operating efficiency)

A competitive cost base underpinning robust margins

Unit costs down c.20% from prior year

- Addition of lower cost Wintershall Dea portfolio
- Strong production volumes
- Improved UK cost structure
- Sale of high cost Vietnam assets
- Cost controls offset impact of weaker USD

Wintershall Dea integration

- ✓ Transitional Services Agreement fully exited
- ✓ Focus now on systems and process simplification
- ✓ Leveraging increased scale to deliver cost savings
- ✓ Driving performance across expanded portfolio

Operating costs¹
\$ billion

Unit operating cost¹
\$/boe

2025 unit operating cost¹
\$/boe

Focusing capital investment on our highest return, most competitive projects

Significant reduction in total capex/boe¹ from \$19 (2024) to c.\$13 (2025)

Total capex

\$ billion

Capital projects progressed

- Norway: Maria Phase 2 completed; 5 subsea tie-backs due to start up production within next 24 months (incl. Dvalin North mid-2026)
- UK: New wells onstream and successful intervention campaigns at key operated hubs
- Argentina: Offshore Fenix project completed; further drilling at APE Vaca Muerta recommenced in Q4 2025
- New wells also onstream in Germany, Egypt and Indonesia

Further high-grading of capital programme

- 2025 total capex lower than guidance with reduced UK activity, APE drilling pause (Arg.) and reduction in some Mexico & Norway spend
- Near-term capex focused on converting reserves to production, targeting high value, short cycle opportunities
- 2026 total capex of \$1.7-1.9bn reflecting reduced UK investment, continued high grading and strict capital discipline

Targeted investment metrics

IRR>20%; Breakeven <\$40/bbl or <\$5/mscf

Large and diverse 2C resource base underpinning material, sustainable cash flow

Maturing the highest return, most competitive projects within our disciplined financial framework

2P reserves and 2C resources¹ bnboe

High value, short cycle projects (c.700 mmboe)

- Infill drilling, tie-backs to infrastructure, mainly in Norway, Argentina, UK, Egypt
- Norway early phase projects matured including Gjøa Nord, Ofelia, Cuvette & Adriana/Sabina
- CMA-1 (Arg.) licence extended
- New discoveries (Norway, Egypt)

>300 mmboe

Total net 2C resource in Norway
at YE 2024

Vaca Muerta, Argentina (c.600 mmboe)

- At APE, maturing future drilling locations, improving drilling efficiency and debottlenecking
- Construction started at SESA, a two-vessel phased 6 mtpa LNG project; phase 1 start up targeted end 2027
- Successful oil pilot at San Roque; discussions for unconventional licence progressing

c.600 mmboe

Net 2C resource in Vaca Muerta
licences at YE 2024

Major, offshore growth projects (c.600 mmboe)

- Large operated oil discoveries in Mexico and a multi-TCF gas play in Indonesia
- At Zama (Mexico) operatorship transferred to Harbour; phased FPSO development planned
- Operated Kan (Mexico) resource upgraded by 50% to c.100 mmboe (net)

>400 mmboe²

Net 2C resource in Mexico
at YE 2024

¹ As at YE 2024. ² Excludes additional volumes associated with Kan resource upgrade which occurred post YE 2024.

Increased 2025 free cash flow of \$1.1 billion

Strong operational and financial delivery offset softer commodity prices

¹ Assumes FY25 Brent & European/UK gas prices of \$80/bbl & \$13/mscf; ² Includes mitigating actions and improved working capital management ³ Reflects FY25 Brent & European/UK gas prices of \$69/bbl & \$12/mscf

Delivering against our capital allocation priorities

1. Committed to investment grade

- Prudent financial policy
- Through cycle leverage target of <1.0x

2. Robust and diverse portfolio

- Growing to c.500kboepd
- <\$15/boe operating costs
- High-graded capital programme

3. Shareholder returns

- Competitive, sustainable shareholder returns
- Intend to adopt a payout ratio approach, incorporating a base dividend and buybacks

Net debt reduced to \$4.4bn, leverage less than 1x at 0.6x

Owing to rounding, totals do not match the sum of the component parts ¹Reflects \$1.035/€ at 31 December 2024; \$1.175/€ at 31 December 2025. ² Net debt excludes unamortised fees and \$0.1bn impact of cross currency swaps. ³ FCF is before hybrid interest payments. ⁴ Includes c.\$89m of buybacks completed at 31 December 2025.

Harbour Energy | Investor Presentation (January 2026)

c.80% of senior debt USD denominated on a post-swap basis

Year end 2025 mark to market gain on cross currency swap portfolio of \$0.1bn

Existing maturities pre-funded to 2028; YE 2025 leverage of 0.6x

Proposed acquisition funding expected to increase near term leverage above 1.0x

Moodys and Fitch confirmed Investment grade credit ratings post announced December transactions

High grading our capital programme

(Excludes effect of transactions – LLOG and Waldorf acquisitions, Indonesia divestments – announced in December)

Portfolio sustains material production well beyond 2030

(Excludes effect of transactions – LLOG and Waldorf acquisitions, Indonesia divestments – announced in December)

2026 Guidance and outlook (excludes effects of announced transactions)

Strong 2025 performance, beating/at upper end of guidance despite price weakness

	2025 (Jan 2025)	2025F (Nov 2025)	2025 actuals	2025 actuals vs initial guidance	Guidance 2026 ¹
Production <i>kboepd</i>	450-475	465-475	474	↑	435-455
Unit opex <i>\$/boe</i>	c.14	c.13.5	13.0	↓	c.13.5

Free cash flow <i>\$bn</i>	1.0	1.0	1.1	↑	c.0.6 ³

2026 Free cash flow sensitivity

Brent: A $\pm$ \$5/bbl change impacts FCF by c. $\pm$ \$150m

Euro gas: A $\pm$ \$1/mscf change impacts FCF by c. $\pm$ \$150m

¹ Assumes \$1.35/£, \$1.15/€ and NOK10.25/\$ ² Includes production and development, exploration and appraisal and decommissioning ³ Assumes mid-point of production and capex guidance and \$65/bbl Brent and \$11/mscf European/UK gas. Free cash flow (FCF) includes capex, tax and excludes hybrid bond interest, debt repayment and shareholder distributions.

Continued strategic execution

Three complementary transactions announced December 2025 materially increase FCF

Recycle capital, enhance cash flow and reinvest in accretive growth

Sale of Indonesia assets

- Portfolio high grading
- Sub-scale production with high opex and GHGi
- \$215m¹ to recycle into capital allocation framework
- Closing expected Q2 2026

Announced
8 December

Acquisition of Waldorf (UK)

- Immediately, materially free cash flow accretive
- Net cash inflow of c.\$180m on completion
- Adds \$0.9bn of UK tax losses (tax effected)²
- Closing expected Q2 2026

Announced
12 December

Acquisition of LLOG (US)

- Unique opportunity to enter US GoA as an operator
- Exceptional team with strong track record of delivery
- Substantial production and cash flow growth
- Closing expected late Q1 2026

Announced
22 December

¹ Before customary adjustments and includes a deposit which was paid in 2025 ² Reflects losses relating to UK CT of c.\$2,450 million, SCT of c.\$1,800 million and EPL of c.\$60 million

Strategic entry into deepwater US Gulf of America

Acquisition of LLOG for \$3.2 billion (effective date 1 October 2025); expected completion in late Q1 2026

Unique opportunity to enter US Gulf of America at scale, establishing another core business unit

Secures an exceptional team and a premium, operated offshore oil portfolio in a prolific O&G basin

H1 2025 production of 34 kboepd¹, expected to double by 2028

Adds high margin 2P reserves at \$12/boe² and a material exploration portfolio

Significantly enhances cash flow longevity underpinned by production growth and extended reserve life

Funded via \$2.7bn cash and \$0.5bn equity with c.175m shares to be issued at 215p/sh; sellers to own c.11% of voting ordinary shares on completion

LLOG significantly enhances Harbour's free cash flow outlook...

LLOG production

>2x

2028 vs H1 2025

Tax rate³

c.23%

vs 78% Harbour standalone

FCF uplift from LLOG

c.60%

2026-2030 vs Harbour standalone⁴

¹ LLOG working interest ("WI") production ² Based on 2P WI reserves at YE 2024 ³ Blended federal and state tax rate ⁴ Pre- Waldorf and LLOG acquisitions

LLOG acquisition is accretive to Harbour across key operational and financial metrics

Unlocking the next chapter: Harbour's strategic expansion into the deepwater Gulf of America

1 Strategic entry into GoA at scale	- Establishes a material presence in a prolific O&G basin with a top tier portfolio and world class team - Increases 2P reserves by 271 mmboe¹ (+22%) and adds a growing production profile - Complements our offshore assets and capabilities and creates supply chain synergies, e.g. Zama, Kan
2 High-quality, long-life assets	- Increases Harbour's oil weighting, OECD presence and operational control - Accretive to margins and lowers Harbour's effective tax rate - Extends Harbour's 2P reserve life to 8 years, benefiting from LLOG's significant reserve life²
3 Growth with significant upside	- Production of 34 kboepd³ to double by 2028, securing Harbour production at c.500 kboepd - Deep inventory of high return, low breakeven, infrastructure-led investments - Significant exploration opportunity with a team responsible for 1 in 3 of GoA discoveries since 2014⁴
4 Financial strength, sustainable returns	- Supports investment grade balance sheet with enhanced scale, reserve life and free cash flow - Free cash flow per share accretive from 2027 - Material and increasing free cash flow supports competitive shareholder distributions and deleveraging

Note: Production, reserves, and reserve life presented on a working interest basis. ¹ 2P reserves at YE 2024 ² 2P reserve life is calculated as YE 2024 2P reserves divided by H1 2025 production ³ H1 2025 production ⁴ Management estimate

LLOG: Unique opportunity to enter one of the world’s most prolific oil and gas basins

A top tier portfolio and world class team in a highly supportive regulatory and fiscal environment

H1 2025 metrics for LLOG:	100% Operated production	\$12/boe Unit operating cost	c.23 % Tax rate ²	22 years 2P Reserve life ³
--------------------------------------	------------------------------------	--	--	---

Source: Management estimates, metrics provided on working interest basis ¹Includes: Dome Patrol, Bellis, Praline, Spruance, Taggart ²21% Federal income tax rate and assumes c.2% state taxes ³2P reserve life is calculated as YE 2024 2P reserves divided by H1 2025 production ⁴ H1 2025 to YE 2028
Harbour Energy | Investor Presentation (January 2026)

LLOG: long-life deepwater hubs with high-rate wells drive significant free cash flow growth

Who Dat (45%, op.)

- H1 2025: 14 kboepd (WI)
- Ongoing infill drilling supports production
- Progressing development of Who Dat East and Who Dat South discoveries
- Upside potential in deeper reservoirs
- Additional prospects in newly secured lease

c.11 years

2P reserve life¹

Buckskin (33.8%, op.)

- First production 2019, achieved at significantly lower cost than planned
- H1 2025: 10 kboepd (WI); 4 wells online with 5th in progress, tied back to Lucius
- Excellent well deliverability (reservoir quality and completions expertise)
- Plans to increase production through infill wells and tie-backs

c.95 mmboe

2P reserves²

Leon-Castile (33%-48.2%, op.)

- Discovered in 2014, developed with a first of its kind refurbished floating production unit (Salamanca)
- Start up Q4 2025; rates of c.14 kboepd (WI) at YE 2025
- Significant infill drilling inventory
- Infrastructure unlocks future development in Keathley Canyon

Q4 2025

First oil and production ramping up

Note: All production, reserve and reserve life metrics are presented on a working interest basis. ¹2P reserve life is calculated as YE 2024 2P reserves divided by H1 2025 production ² 2P reserves at YE 2024

LLOG: Largest resource base among independents in Gulf of America drives growth

Disciplined exploration and developed strategy drives long term value creation

¹ Source: Woodmac Lens, remaining resources (working interest) - 2P reserves and commercial 2C – by company excl. Majors ² Management estimate ³ “Big Beautiful Gulf 1 Sale ” Dec 2025; based on LLOG being the apparent high bidder.
Harbour Energy | Investor Presentation (January 2026)

Concluding remarks

Why Harbour Energy?

- ✓ A track record of strategic, operational and financial delivery supported by a world class team
- ✓ A large scale, diverse producing asset base with a competitive cost structure and exposure to Brent oil prices and European gas prices
- ✓ Broad set of attractive strategic investment options, with c.20 years of organic inventory and proven M&A capability
- ✓ Significant and sustainable free cash flow generation, investment grade credit ratings, and rigorous capital discipline
- ✓ Returns-focused with competitive, distributions policy and track record of returning excess free cash flow to shareholders

Prudent risk management with a systematic approach to hedging

Hedging to protect the balance sheet while maintaining price appreciation exposure amidst volatile market

- ✓ Significant hedge position with c.\$0.5bn mark to market gain at 31 December 2025¹
- ✓ c.\$4bn¹ of revenue secured (2026-2028) through hedging
- ✓ Disciplined risk management approach with 2-year rolling horizon
- ✓ Hedging 50% and 30% of economic exposure in Year 1 and 2 respectively²
- ✓ Target 50/50 split of fixed price and non-linear strategies

European gas volumes hedged

c.50% of 2026 economic exposure to European gas prices hedged²

Liquid volumes hedged

c.40% of 2026 economic exposure to Brent hedged²

¹ Based on forward curve as at 31 December. ² Target hedge ratios reflect effectively hedged price exposure; actual transacted volumes can be smaller to account for onshore/offshore tax asymmetries and royalty effects. ³ Reflects volume weighted average of traded swap/fixed price and, for collar structures, the forward curve at 31 December 2025 if forward curve pricing is between the cap and the floor or the floor/cap price if forward curve pricing is outside collar range.

A leading producer and explorer in Norway

Harbour is the largest international operator and one of the largest natural gas producers in Norway

- Diversified asset base; multiple export routes
- High operating margins
- Strong equity position in multiple key host facilities
- Subsea development specialist
- Pipeline of high value, near term projects
- Proven E&A track record supporting future production

2P reserves & 2C resources

Outperformance in 2025

- ✓ Production of 155 kboepd, supported by improved operating efficiency and new wells on-stream
- ✓ Best in class drilling performance at J-Area wells
- ✓ Unit opex of c.\$18/boe, top quartile in the UK
- ✓ Highly synergistic acquisition of Waldorf announced Dec. 2025

Selectively investing going forward

- ✓ Continued fiscal and regulatory uncertainty
- ✓ UK staff reductions
- ✓ Continued efforts to reduce costs and optimise decommissioning
- ✓ UK now has to compete for capital in a global portfolio

Total capex

\$million

Largest international independent oil and gas company in Argentina

Long life production with potential for material growth

- Active in Argentina since 1978
- One of country's largest gas producers
- Long term production potential
- Significant reserve replacement opportunity with huge 2C resource
- FID on Southern Energy LNG, a two-vessel c.6 mtpa project (Harbour 15%); export permits and RIGI incentives secured

2P reserves & 2C resources

Building a focused CCS business for the UK and European market

Harbour CCS projects must deliver attractive returns and compete for capital

- Potential to provide long-dated, stable cash flow
- Offering a route to unlock value through reuse of legacy assets
- Prioritising most advantaged, cost competitive projects
- Actively managing portfolio; decision taken to exit non-core licences
- Secured UK government funding support to FID for Viking and Acorn

>650 mt

Net CO₂ storage resources

Leading

CO₂ storage position in Europe

Greensand Future

- Ineos operator, Harbour 40% non-op
- Reuse of existing offshore infrastructure
- FID end 2024; start-up end 2026
- Injection rate of c.400 ktpa
- Defers decommissioning by 8 years
- EU grant award¹ supporting construction

Short cycle, low capital intensity

Greenstore

- Harbour operator 40%, Ineos 40%, Nordsøfonden 20%
- 70 mt gross CO₂ storage
- Located near key Danish industries
- Seismic acquisition planned for Q4 2025
- Strong Danish government support

Cost competitive, onshore licence

Viking

- Harbour 60% operator, bp 40%
- >400 mt CO₂ gross storage
- Located in UK's industrial centre
- Repurposing 30mtpa LOGGS pipeline
- UK government financial support to FID

Large scale, cost competitive
